

WDM1132

Midterm Exam Preparation

For the midterm exam, you will need to know how to do the following:

- Import Photoshop Layers/Files into Flash
- Write Actionscript functions
- Write Actionscript event listeners
- Stop an movie clip's timeline with Actionscript
- Go to specific frames in a movie clip timeline using Actionscript
- Change properties of movie clips using Actionscript
- Use CLICK, MOUSE_OVER, MOUSE_OUT, MOUSE_DOWN, MOUSE_UP events to trigger functions
- Create and run an Actionscript Tween
- Use the Tween MOTION_FINISH event to trigger a function or another tween
- Load an external image file
- Load an external .swf file
- Load and play an external mp3 file
- Use Actionscript to dynamically update a text field
- Create original names for Variables and Functions

You may bring printed notes and your textbook for reference during the exam, but no digital files are allowed.
